

COAX ADAPTER

DESCRIPTION

The COAX ADAPTER is capable of transmitting digital signal, up to 100 meters with a data rate up to 400 Mbps. The adapter is connected to the already installed coax wire with splitters present in homes, apartments, etc. The transmission occurs without disturbing the existing cable and satellite signals. Within a single room, the transmission can be also wireless. The adapter uses a number of legacy ports for connecting to CE devices and is based on the Pulse Link chip set devices.

The following platforms are offered:

- IEEE 1394 OVER COAX via up to two IEEE 1394a copper ports
- ETHERNET OVER COAX via one RJ 45 copper port
- HDMI OVER COAX via up to two HDMI copper ports
- OPTICAL 1394 FOR FAST ETHERNET via up to two OPTOLOCK ports

The product will be shown at OFCNFOEC booth number 3939 taking place in San Diego, Ca. Convention Center from February 24-28, 2008

Note: Optolock is a registered Trademark of Firecomms Ltd., Ireland
